REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or render obvious the overall claimed invention of a device for closing an opening in a blood vessel comprising: a first wire group assuming a first shape in a cannula; a second wire group assuming a second shape in the cannula; and a wire fixation device operably coupled to the first and second wire groups; wherein the positions of the first wire group and the second wire group are independently adjustable; the first wire group is deployable from the cannula into an interior region of the blood vessel whereby the first wire group assumes a third shape different from the first shape; the second wire group is deployable from the cannula whereby the second wire group assumes a fourth shape different from the second shape; and the fixation device is deployable from the cannula and is adapted to affix the first and second wires in their desired positions to thereby effectuate closure of the opening in the blood vessel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6949107 B2, US 6749622 B2, US 6447524 B1, US 5350399 A.
